

Public trainings in English: Overview 2016

Our engineers provide regular trainings about various topics of mechanical engineering at our head office in Switzerland. We offer a full training week that covers Introduction to the software handling and to the optimization strategies according to current standards, followed by a special training focusing on small plastic gears. Trainings in designing a complete transmission system in KISSsys are divided in Basic training and advanced trainings in various application fields. In all training courses, each participant receives a full version of the calculation program for the practical exercises.

KISSsoft Training

Time: 09.00 – 17.00

Price: 500 EUR (1 day) • 1.000 EUR (2 days) • 1.500 EUR (3 days)

Shaft Calculation, Basic & Advanced (2 days)

April 12 – 13, 2016

GPK System Calculation

April 14, 2016

Gear Calculation, Basic & Advanced (3 days)

October 4 – 6, 2016

Special Training for Gear Optimization

Time: 09.00 – 17.00

Price: 750 EUR (1 day) • 1.000 EUR (2 days) • 1.800 EUR (3 days) • 1.500 EUR (3 days)

Gearbox Design and Analysis in England

March 8 – 10, 2016

**Contact Pattern Analysis – with Workshop
Covering the calculation modules ZA30-35
(3 days)**

June 14 – 16, 2016

Plastic and Sintered Gears

October 7, 2016

Bevel Hypoid Gear

October 7, 2016

KISSsys Trainings for Transmission System Sizing

Time: 09.00 – 17.00

Price: 1.000 EUR (2 days) • 1.500 EUR (3 days)

Basic Training KISSsys (3 days)	February 23 – 25, 2016	August 30 – September 1, 2016
Advanced: KISSsys for Industrial Gearboxes (2 days)		April 5 – 6, 2016
Advanced: KISSsys for Planetary Gears (2 days)		December 6 – 7, 2016

Would you like to enhance your knowledge in our training courses?

- You can find further specifications of each training on www.KISSsoft.AG
- Apply quick and simple through our website!
- With the confirmation of your registration to a training, you will receive information about accommodations near to Bubikon to make our planning easier.
